

Rural Residential (17)

Location: West and north edges of the project area.

Photosignature: Rectangular shapes for houses, landscaping, and outbuildings. Roofs, lawns, access roads, etc. appear in a variety of colors.

Figure: On page G-21.

Ranch Developments (18)

Location: Isolated buildings and corrals on private lands, often near pastures (22).

Photosignature: Similar to rural residential (17).

Figure: On page G-21.

NPS Facilities (19)

Location: Monument facilities, located at the end of the main park road. Includes buildings, a water tower and sewage treatment ponds.

Photosignature: Individual structures are easily identifiable. The fact that they are park facilities was confirmed in the field.

Figure: On page G-21.

Utility Corridors (20)

Location: A telephone line cuts east-west through the central part of the project area.

Photosignature: This type was field verified. It consists of a narrow belt of smooth, gray-green color.

Figure: On page G-21.

Transportation Routes (21)

Location: Transportation roads, including improved county roads and unimproved tracks, occur throughout the project area.

Photosignature: White for gravel and dirt roads, black for paved roads. Texture is smooth for all roads.

Figure: On opposite page.

Pastures (22)

Location: North center edge and the west edge of the mapping area, on private lands.

Photosignature: Smooth-textured, light grayish-green for dormant grasslands. Straight edges indicate fence lines or the boundary of pasture plantings.

Figure: On opposite page.

Reservoirs (23)

Location: The historic reservoir site on private land in the bottom of Walnut Canyon.

Photosignature: Whitish-gray reflecting bare ground; smooth gray texture indicating annual herbaceous vegetation. The dam structure is evident.

Figure: On opposite page.

Stock Tanks and Dams (24)

Location: Scattered throughout the project area outside the Monument boundary.

Photosignature: Usually a dark blue-green spot surrounded by a curved shape in white, gray or orange, depending on the color of the substrate the tank was dug in.

Figure: On opposite page.

Examples of aerial photosignatures for Anderson Land Use map classes at Walnut Canyon as they appear on the aerial photographs. Map code numbers are in yellow.
